Vũ Xuân Phương

Date of birth	12/01/1991
Gender	Male
Phone	0377965901
Email	vxp20xx@gmail.com
Address	17/21 Tân Thuận Tây, Bình Thuận, Hồ Chí Minh

OBJECTIVE

I'm .Net Developer with 1 year+ experience. I have working with .Net, .Net core, SQL server, MySql ReactJs.

WORKING EXPERIENCE

Apr 2022 - Jan 2023	**Green Beli** Fresher Unity Developer

EDUCATION

Jul 2021 - Dec 2023	**Aptech Aprotrain** Full Stack Developer I am currently study semester 3 in Aptech
Jul 2021 - Aug 2022	**Green Academy** Unity Developer Graduate

SKILLS

C#, Dot Net Framework	8/10
SQL Server	8/10
Git,Smart Git	7.5/10
English	6.5/10

ADDITIONAL INFORMATION

- Proactivity, creativity,studious
- Good problem-solving skills
- Good communication skills
- English proficiency needed
- Good skill with OOP, react, Dot Net and Sql Server
- Knowledge about WPF, ASP .Net, .Net core
- Knowledge about Factory, Facade design pattern
- Good work both independently and in teams on solutions for specified requirements.

CERTIFICATE

03 Aug 2022	Certificate of completion
30 Sep 2022	Certificate of participation

PROJECTS

Jan 2023 - Jan 2023	**PROJECT TRAIN TICKET** Full-stack Web application: - Build website - Fix bug, optimise performance - Source: https://gitlab.com/PhuongVu9x/traintickets
Jan 2023 - Jan 2023	**PROJECT STAFF MANAGERMENT** Full-stack WPF: - Build app - Fix bug, optimise performance - Source: https://gitlab.com/PhuongVu9x/staffmanagementwpf
Oct 2022 - Dec 2022	**PROJECT VNHP-REAL-ESTATE** Back-end Desk application: - This project about internal Software for Real Estate Company. Main work: - Design database. - Management of Revenue, Statistic of Projects/Products - Insert/edit/change status for Investors, Products, Projects, - Support team. - Source: https://gitlab.com/phuongvx1/vnhp-real-estate - Link: https://www.youtube.com/watch?v=-X04Wa_7BYs
Oct 2022 - Dec 2022	**PROJECT VNHP-HEAL-CARE** Back-end Desk application: - Our project is about Personal Health Assistant. This web application will enable users to register and then, they can book appointment, view appointment, save regular records regarding their health, and they can also track medicine dosage schedul Main work: -User Profile -Booking Form -Login + Register form (User) -Payment Gateway - Doctor Management - Support team. - Source:https://gitlab.com/vnhp-group/fitness-lifestyle-tech-wiz - Link: https://www.youtube.com/watch?v=JYM16JwFCSU&t=18s
June 2022 - July 2022	**PROJECT VNHP-ONLINE-AUTION**

Web application:
 - This project about online aution. User can register,login,view,aution,online payment.

Main work:
 - Design database.
 - User profile,register,login.
 - Support team.

PROJECTS DETAIL

PROJECT TRAIN TICKET
(Mar 2023 - Mar 2023)

Customer	This project about website sell train ticket online.
Description	- This software provides solution for sell train ticket, online payment by vn pay: * Client: - Login - Register - Home page - Select train station - Buy Ticket, Train view - Drop cart, View cart, Submit cart - Vn Pay view * Admin: - CRUD admin, station,train,class,fare,schedule,customer,ticket - Online support by ticket
Team size	1
My position	Fullstack

My responsibilities	- Database
	- Optimize system
	- Parallel task:
	- Feature:
	 * Client:
	   -- Login: login by account, google or facebook
	   -- Register: register with email, send activate if register successfull
	   -- Home: Select strain station: from where to where
	   -- Buy ticket:
	     + Search by datetime
	     + Select schedule, view train, select seat
	   -- Drop cart: remove all selected ticket
	   -- View cart: view all selected ticket
	   -- Submit: move to vnpay, if payment success then insert ticket to database

Technologies used	Software: - Visual studio 2022 Technology: - Database : Sql server - GitLab: save source code - MVC: .Net Core

PROJECT STAFF MANAGEMENT
(Jan 2023 - Jan 2023)

Customer	This app build by customer request
Description	- This software provides solution for shilf management, salary by month, export report(pdf): * Shilf: - Create,update shilf - Update late time, special day * Staff: - New position - New staff, view staff * Salary: - View salary * Receipt: - View report
Team size	1
My position	Fullstack
My responsibilities	- Database - Optimize system - Parallel task: - Feature: * Shilf: - Update shilf time - Update late time - Update special day * Staff: - Create, view, update position - Create, view, update staff * Salary: - Select datetime -- View salary in selected month * Receipt: - Select datetime -- View report in selected month
Technologies used	Software: - Visual studio 2022 Technology: - Database : save object - GitLab: save source code - Back-end: .Net Framework - Front-end: xaml - Parallel task

PROJECT VNHP-REAL-ESTATE
(Oct 2022 - Dec 2022)

Customer	This project about internal Software for Real Estate Company
Description	- This software provides solution for company to manage all activities so we dividedinto 4 departments: * Business: - Management of Contracts - Create new Contracts when customer buy products - Insert/update/change status contracts* Accountant: - Management of Receipts - Create new Receipts when customer has paid - Insert/update/change status receipts - Remind customer before bills up to date. * Director: - Management of Revenue, Statistic of Projects/Products - Insert/edit/change status for Investors, Products, Projects, * Human Resources: - Management of Employees - Create new HR Contract - Insert/update/change status of Employees
Team size	5

My responsibilities	- Database
	- Optimize system
	- Multithread:
	  * Login:
	    - Spin logo, loading text
	  * Director department:
	    - Load preset data
	  * Business department:
	    - Loading ring, insert data
	    - Director Department:
	  * Dashboard:
	    - Show revenue of month, revenue of year
	    - Statistic of projects, products, customers, staffs
	    - Chart show product sold quantity every month
	    - Chart show revenue/ dept
	    - Chart show total product sold (land/ house)
	    - Table show top 10 customer
	  * Form (Add new, update, change status):
	    - Company
	    - Construction Unit
	    - Direction + Region
	    - Utilities + Project
	    - Group Blocks
	    - Blocks + Products
	    - Investors
	    - Contract Type
	    - Customer Type
	    - Director Department:
	  * Account Statistic:
	    - Button salary calculate all staff have

Technologies used	Software:
	  - Apache NetBeans IDE 14- SQL server 2019- Scene Builder
	Technology:
	  - GitLab: save source code
	  - Back-end: Java (JDK 18)
	  - Front-end: JavaFX
	  - Jasperreport- Jakarta mail
	  - Spinner- Animation (Logo): RotateTransition
	  - Multi thread

PROJECT PROJECT VNHP-HEAL-CARE

(Jun 2022 - Jul 2022)

Customer	Our project is about Personal Health Assistant. This web application will enable users to register and then, they can book appointment, view appointment, save regular records regarding their health, and they can also track medicine dosage schedule.
Description	-They can choose our health package with suitable price to check out their health for more detail, and with service like book appointment and health package, they can pay money through PayPal gateway. - We also create a health library which provides more knowledge about health, healthy food, fitness. - Our Admin will divided in Doctor Management and Admin. **Function: *User: - Login - Register (User) - Side pages: About + Contact (has map + feedback about website) + Term & Policy - Display Product (Health Package) - Search & Filter Product - Popup to view Product Detail - Booking Appointment (choose services and doctor you want) - Payment (PayPal Gateway) - Health Library (small blog to provide more information about health, healthy food,

History, New Bill)
 *Admin:
  - Login + Logout
  - Profile Admin (edit, change password): Dashboard (Charts, Statistical) Bill datatable – detail Product datatable – add + edit Medical Speciality Category datatable – add + edit Feedback
  - Profile Doctor: (edit, change password): Create bill + dosage for patients View Patient record, new appointment, bill.

Team size	4
My position	Backend
My responsibilities	Design database. Design Layout + Function (User + Admin): - User Profile -Booking Form - Login + Register form (User) - Payment Gateway -Doctor Management
Technologies used	SOFTWARE: - Visual Code 2019 - SQL server 2019 - GitHub (source code) TECHNOLOGY: - Back-end: Lavavel Api - Front-end: Reactjs

PROJECT VNHP-ONLINE-AUTION
(Jun 2022 - Jul 2022)

Customer	This project about website online aution. User can register,login,view,aution,online payment.

Description	- Our project is about online bidding auction which we can bid on product in real time count down. (Our business is C2C, so customer can also be owner of product. With position is owner of product, they will send us information of products and our admin will upload them on website).
	 - Customer can view, filter, or search to look for products but when they want to bid or leave a feedback, we constrain them to login before doing those actions. (When customer has action like register account or forget password, we will send email for them to verify).
	 - Our website doesn't have shopping cart because after count down over, our system will automatically send a verify payment email to customer who has the highest bid and same time, their user profile will update new bill which has payment button once they already confirm the email. (In case of product doesn't has anyone bid, it will show an announcement to let user know that product is expired and also the input price will be disabled). Customer will click on payment button and we will direct them to payment gateway to proceed payment by Paypal.
	 - After payment succeed, their record in New Bill will disappear and in Bill History will update payer_id provided paypal paid code which they can double check on their paypal account.
	
	**Function:
	 *User:
	  - Side pages: About + Contact (has map + feedback about website) + Term & Policy
	  - Display Product
	  - Search & Filter Product
	  - Bidding Online
	  - Product Detail + Feedback for each Product
	  - Login
	  - Register (User)
	  - Payment (Auction History, Bill History, New Bill)
	  - Profile (Edit user information, Change password)
	 *Admin:
	  - Login + Logout
	  - Dashboard (Charts, Statistical)
	  - Profile (edit, change password) - Bill datatable - detail

	- Category datatable – add + edit - Feedback
Team size	4
